A NOSSA HISTÓRIA INTRODUÇÃO

Fundada em 1963 em Tondela, a Urfic começou a sua actividade com a fabricação de artigos de ferragens em latão usando o sistema de fundição de areia. Este processo foi gradualmente desenvolvido e transformado graças ao dinamismo do seu fundador – Urbano Figueiredo da Cruz – e é, actualmente, uma das empresas líderes a nível mundial na fabricação de puxadores em latão para mobiliário e construção.

As constantes transformações que se foram seguindo nos sistemas de fabrico, desde a automatização da fundição de areia, passando pela injeção, até ao actual e moderno sistema de forjagem a quente totalmente automatizadas e computerizadas, aliadas à alta tecnologia, experiência e bem alicerçado know-how e constante investigação, colocaram a Urfic num lugar de destaque no mercado internacional, com os seus produtos de alta qualidade e constante actualização do design.

Para assinalar os 45 anos da sua existência e sucesso, a URFIC inaugurou a 03 de Julho de 2008, um showroom na cidade do Porto, um local de excelência para relações comerciais, tido como o maior do sector na Europa, onde se encontra exposta toda a vasta gama de produtos URFIC.

NOTRE HISTOIRE INTRODUCTION

Fondée en 1963 à Tondela, l'Urfic a débuté son activité par la fabrication d'articles de quincaillerie en laiton en ayant recours au système de fonte de sable. Ce procédé a progressivement été mis au point et transformé grâce à la dynamisme de son fondateur – Urbano Figueiredo da Cruz. Cette entreprise est désormais leader à l'échelle mondiale dans le domaine de fabrication de poignées en laiton dans le secteur du mobilier et de la construction.

Grâce aux permanentes transformations des procédés de fabrication, qu'il s'agisse de l'automatisation de la fonte de sable, en passant par l'injection pour arriver jusqu'au système actuel et moderne de forgeage à chaud, totalement automatizées et assistées par ordinateur, combinées à la haute technologie, à l'expérience, au savoir-faire et à la recherche constante, l'Urfic occupe désormais une place notable sur le marché international, en offrant des produits de haute qualité et une constante actualisation du design.

Le 3 juillet, l'URFIC a inauguré une salle d'exposition à Porto, afin de marquer ses 45 ans de présence et succès. Il s'agit d'un espace d'excellence pour les relations commerciales, étant considéré comme le plus grand du secteur en Europe. La vaste gamme de produits de l'URFIC s'y trouve exposée.

OUR HISTORY INTRODUCTION

Founded in 1963 in Tondela, Urfic started activities manufacturing brass fittings using a sand casting system. This process has been gradually developed and transformed thanks to the dynamism of its founder – Urbano Figueiredo da Cruz – and is currently one of the leading global manufacturers of brass handles for furniture and construction.

The constant changes that have followed in manufacturing systems, from the automation of sand casting, through injection, to the current and modern system of totally automated and computerised hot forging, allied to high technology, experience, well-established know-how and constant research, have put Urfic in a prominent position in international markets, with its high-quality products and constantly updated design.

To mark 45 years of its existence and success, on 03 July 2008 URFIC opened a showroom in the city of Porto, a prime location for trade, considered the biggest sector in Europe, where the vast range of URFIC products can be found on display.

NUESTRA HISTORIA INTRODUCCIÓN

Fundada en 1963 en Tondela (Portugal), Urfic ha comenzado su actividad con la fabricación de artículos de ferretería en latón usando el sistema de fundición de arena.

Este proceso ha sido gradualmente desarrollado y transformado gracias al dinamismo de su fundador – Urbano Figueiredo da Cruz – y es, actualmente, una de las empresas líderes a nivel mundial en la fabricación de pomos en latón para mobiliario y construcción.

Las constantes transformaciones que han sido seguidas en los sistemas de fabricación, desde la automatización de la fundición de arena, pasando por la inyección, hasta el actual y moderno sistema de forjado en caliente, totalmente automatizadas y computerizadas, unidas a la alta tecnología, experiencia, saber hacer bien estructurado, y constante investigación, dan a Urfic un lugar de destaque en el mercado internacional, con sus productos de alta calidad y constante actualización de su diseño.

Para celebrar sus 45 años de existencia y éxito, URFIC ha inaugurado el 3 de julio de 2008 una sala de exposición y venta en Oporto, una ubicación privilegiada para relaciones comerciales, conocida como la principal del sector en Europa, donde está expuesto todo el abanico de productos URFIC.

O NOSSO LUGAR NO MUNDO INovação E KNOW-HOW

FILIAIS

Acompanhamos as constantes transformações que se foram seguindo aos sistemas de fabrico, desde a automização da fundição de areia, passando pela injeção, até ao actual e moderno sistema de forjagem a quente, totalmente automatizado e computorizado. O que colocou a Urfic num lugar de destaque no mercado internacional, com os seus produtos de alta qualidade e constante actualização do design.

NOTRE PLACE DANS LE MONDE INNOVATION ET SAVOIR-FAIRE

FILIALES

Nous accompagnons les transformations permanentes qui succèdent aux systèmes de fabrication: dès l'automatisation de la sable de fonderie et l'injection, jusqu'au système de forgeage à chaud actuel et moderne, complètement automatisé et informatisé. Grâce à ce procédé, Urfic occupe désormais une place notable sur le marché international en offrant des produits de haute qualité et une actualisation permanente du design.

OUR PLACE IN THE WORLD INNOVATION AND KNOW-HOW

SUBSIDIARIES

We accompany the constant transformations after the manufacturing systems, since sand casting automatization and injection to the actual and modern system of hot forging, totally automated and computerized. This placed Urfic in a prominent place on the international market, with its high quality products and constant design update.

NUESTRO LUGAR EN EL MUNDO INNOVACIÓN Y KNOW-HOW

SUCURSALES

Acompañamos las constantes transformaciones que siguieron a los sistemas de fabricación, desde la automatización de la fundición de arena, pasando por la inyección, hasta el actual y moderno sistema de forjado en caliente, totalmente automatizado y computarizado. Por eso, Urfic ocupa una posición de destaque en el mercado internacional, con productos de alta calidad y diseño muy actualizados.
